

Colyer Street

'00' GAUGE MODEL RAILWAY EXHIBITION LAYOUT – DCC; BLUE Era

INFORMATION SHEET

Set in the heart of industrial Tyneside, the layout imagines that the former North British Railway managed to build a station in Newcastle. A former through station, the line was truncated to a terminus, and that is what has been modelled. Passenger services are in the hands of DMUs although a loco hauled service still runs as does an occasional parcels train. Freight serviced are limited to serving a brewery and yard. Other trains run as required. Track is Peco code 75 and Peco point motors are used to change the points. The layout is controlled by an N.C.E Power Cab DCC system

Overall Layout Size	15ft x 18in
Overall Operating Space required	17ft x 6ft minimum
Operates from the front, access round the layout required	
Number of Operators	2
Power Sockets Required	1
Lighting	Yes
Self-Supporting	Yes
Tables	1 for stock
